

Create an account

Sign up for a free qBraid account using Google, or create an account with your email. Once logged in, **verify your email**, then access account.qbraid.com where you can launch your cloud-based IDE.

1

2

Open lab.qbraid.com

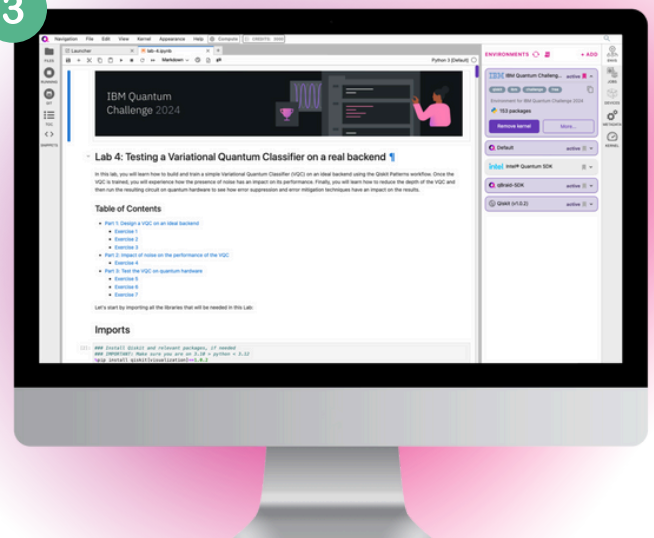

Use the **Launch Lab** button on the top of the account.qbraid.com page. If this is your first time logging in, you will see the **Launch** page. Click on the **Start** button on the **Free** tier to access qBraid Lab.

Use the QGSS Environment

Click on the **Environments Manager** in the top-right corner and search for "Qiskit Global Summer School". Click the **Install** button, and then **Add Kernel**. On the QGSS repository, you can now click the **Launch on qBraid** button and get started!
